Summary

Software Engineer with experience working across different technologies and software products. My work spans mobile, web, and backend development, as well as system integrations, AI-powered applications, and automation. I enjoy contributing to end-to-end development processes and understanding how different parts of a software product work together to solve real-world problems. I am particularly interested in exploring new technologies, learning quickly, adapting to new tools, and continuously expanding my technical skills through practical experience.

Work Experience

SOFTWARE ENGINEER

EPPSO.ai

August 2025 - Present

- Contribute to the development and integration of mobile, web, and backend systems, working across different parts of the product ecosystem.
- Contribute to AI-driven development and automation initiatives, integrating AI capabilities into software products and internal workflows.
- Member of the TÜBİTAK Predict AI project team, contributing to the development and integration of AI-based solutions.

INTERN

EPPSO.ai

March 2025 - July 2025

- Developed the mobile application for an existing web-based product using Flutter, adapting core functionality and user flows for mobile platforms.
- Took responsibility for the mobile application's DevOps processes, implementing and maintaining CI/CD pipelines and Git-based workflows to automate build and deployment processes.
- Contributed to workflow and process automation using n8n, supporting integrations between different services and development processes.

Education

B.Sc. in Software Engineering(EN)

Maltepe University

2021 - 2026

Technical Skills

- Languages: Python, Dart, C#
- Frameworks & Development: Flutter, .NET
- AI & Machine Learning: Machine Learning, LLMs, Hugging Face, Transformers
- Automation: n8n, AI Agent Workflows, LLM Integration
- DevOps & Tools: Git, GitHub Actions, CI/CD

Projects & Certifications

Personal Automation System

Flutter, PostgreSQL, n8n

User-centric automation platform with natural-language control, workflow orchestration, and mobile/backend integration

PopcornIQ

Python, Django, Sentence Transformers, Scikit-learn

AI-powered movie recommendation platform using transformer-based text embeddings and cosine similarity to generate personalized recommendations from user ratings and movie descriptions

Certifications

Machine Learning Specialization — Stanford, 2024

CS50's Introduction to Programming with Python — Harvard, 2024
